## H. L. SPYKE & SON FRUIT CO.

The H. L. Spyke and Son Fruit &c. was started in 1945. Their principle business is packing and shipping gift packages of citrus fruit.

Up to now they have operated in a rented building; however, they have expanded until a larger building is needed.

The land has been leased for the site of a new packing house,
but so far its erection is still in the future. As the plans
for the new building have not been formulated, I will give
my ideas.

The new plant will be bounded in front and in back by roads and on both sides by buildings, so the horizontal expansion will be limited. For this reason, I am in favor of a two story building. The upper story will be used to store box materials, and baskets, machine parts and other miscellaneous items that take up much vital room. Besides storage, the second floor will be used for the assembly of the boxes.

By utilizing the second floor in this manner, the ground floor will be available for packing. The layout of the second floor is relatively unimportant, because it will be used primarily for storage. The important layout is the ground floor. The main processing machines in the new plant will be the same as are now used, so they will be placed in approximately the same positions relative to each other. The position of these machines is important, because the rest or the layout must be made accommonly.

Spyke, H. H.
